## **BID SPECIFICATIONS**

Services anticipated under this proposal include material testing (sub-grade, base, bituminous base and bituminous pavement) as required for our 2011 projects which require asphalt testing, which includes construction and overlay of multiple roadways. Ohmes Road from Birdie Hills Road to St. Peters-Cottleville Road will include base rock testing, bituminous base asphalt and bituminous pavement testing. Lake St. Louis Boulevard from I-70 South Outer Road to the bridge over Peruque Creek will include bituminous pavement testing. Prospect Road from Highway 40/61 to Freymuth Road will include bituminous pavement testing. Ronald Reagan Drive from Lake St. Louis Boulevard to Green Tree Meadows Drive will include bituminous pavement testing. St. Joseph Avenue from Main Street to St. Matthew Avenue will include bituminous pavement testing. St. Matthew Avenue from St. Joseph Avenue to Tom Ginnever Drive will include bituminous pavement testing. Additional projects may be added at the discretion of St. Charles County Highway Department.

Federal funds are to be used in the construction of this project, so all testing will be subject to review and approval of representatives of both the St. Charles County Highway Department and the Missouri Department of Transportation. **All representatives must be MoDOT certified in the discipline of work to be performed and 24 hour notice must be given prior to personnel or change of personnel reporting to the job site.**

The County intends to issue a Notice to Proceed on or about May 18, 2011 for the material testing project. All prices submitted as part of this proposal are to be per each test, as described, and are to be good for the duration of the 2011 calendar year. The County will not be held responsible for extensions of time necessary to complete the work because of utility delays, weather delays and/or for the contractor's inability to complete the work within the allotted time.

The type and number of tests to be conducted on this project are estimated and are based on a testing frequency as follows:

Rock Base Compaction – every 100 feet per lane

Asphalt Base Pavement Compaction – every 100 feet per lane per lift of asphalt

Asphalt Surface Pavement Compaction – every 100 feet per lane per lift of asphalt

Once work on the project gets underway, the selected testing agency will be expected to respond to the County's request for testing within 24 hours of notification by the County.

Tests are to be run by individuals with the necessary background and training (**MoDOT certified**) to properly conduct and report all tests and results. If the personnel dispatched to this project are found to be lacking in the expertise or experience necessary to properly conduct the tests as determined by either the St. Charles County Highway Department or the Missouri Department of Transportation, the testing agency will be required to remove that person from the project and re-conduct tests as necessary by a properly qualified individual. There will be no payment for the re-tests determined to be necessary as a result of unqualified individuals or improper technique.

Immediately upon the completion of each test, an oral report of the results must be given to the on-site County representative and if available, a representative of the contractor. If no County representative is on site, efforts must be made to reach the designated County representative by phone and/or fax, especially in cases of test results not meeting contract specifications.

Written reports of findings must be submitted on bi-weekly basis. These reports must include the date, location, and result of each test run, along with the minimum standard as required by the specifications. Comments regarding failed tests and corrective action taken by the contractor, along with identification of subsequent re-tests, must also be included.

Prices shown shall include all incidentals, including mileage, equipment, clerical, reporting, etc. for each particular type of test. The actual number of each type of test found necessary is subject to change, and payment will be made at the unit price for the actual number of tests run.

Payment for services shall be made based on monthly invoices submitted by the testing agency. Invoices must include an itemization of the number of each type of test run and the unit price, along with a total amount owed.

The County reserves the right to withhold payment of any invoice if the required reports have not been received for the billing period covered by the invoice. Payment would be made following receipt of the required reports.
